**KELSEY'S**

**Hardy American Plants,  
Rhododendrons, Azaleas,  
and Specimen Evergreens**

**I. Catalog of BOXFORD NURSERY**

Boxford, Massachusetts

**II. Catalog of HIGHLANDS NURSERY**

3800 FEET ELEVATION

Pineola, North Carolina

At Boxford Nursery (East Boxford P. O.), on the Georgetown branch of the B. & M. R. R., may be seen growing the choicest collection of specimen nursery stock, selected for the most discriminating buyers. Special attention is given to hardy native plants, which must always be the basis of successful permanent plantings.

**SPECIMEN STOCK.** There is a growing demand for fine specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas and other evergreens, and Boxford Nursery is established to supply this need.

Landscape architects, park and cemetery superintendents, and the owners of large estates will find it of great advantage to visit Boxford Nursery and personally select material in the nursery row.

**PRICES** are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely underground. Frequent transplanting, and handling specimens with adequate, burlaped balls, means success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery; and "cheap" stock will not be handled or sent out. **The best is always the cheapest.**

**HIGHLANDS NURSERY SHIPMENTS** are made from Pineola, N. C., freight station, and prices in this list are made on this basis. Freight and express rates gladly quoted. Via Norfolk steamship lines, deliveries to northern and eastern points are quick and rates are low.

**SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM and KALMIAS** are from my special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South, from high altitudes. **"COLLECTED" RHODODENDRON CATAWBIENSE** comes only from the South.

**MY NURSERIES ARE UNIQUE,** being the first to grow Native American Ornamentals, and having the only large and complete stock of Hardy American Plants in existence.

**SHIPPING BEGINS IN AUGUST,** when I send out large Rhododendrons, Kalmias and other evergreens, and bulbs and herbaceous plants, general shipments going out in October and November; and in spring about March 1 to May 15. Give shipments, unless you wish to leave it to me, my best judgment, but **assume no risk.**

**ALL SHIPMENTS** reach the most remote in perfect condition. I have exported for twenty-five years, and know how to pack. In the only and the great war, however, have left practically only Holland and Great Britain to shipments.

**DESCRIPTIVE CATALOGS,** illustrated, are mailed on request, and advice on the right way to grow Rhododendrons, Azaleas and other native plants is gladly given. Send for "How to Grow Rhododendrons Successfully."

**VISITORS ARE ALWAYS WELCOME.** Boxford Nursery is easily reached by train or automobile, and Mr. Kelsey will be glad to meet prospective customers at the nursery by appointment.

A visit to Boxford Nursery during the blooming season of Rhododendrons and Azaleas is especially worth while.

Indefinite April 27. 1916.

## PART I.

# CATALOG OF BOXFORD NURSERY

Note: All plants are transplanted and nursery-grown unless plainly marked otherwise.

The larger sizes are always shipped with balls and are burlaped, which means they will grow. Prices include all charges, packed free on board cars, Boxford, Mass., freight station.

## Evergreen Trees and Shrubs

	Each	10	100	1,000

10 to 12 ft. ....	25 00			
12 to 14 ft. ....	35 00			
14 to 16 ft. ....	45 00			

***Abies fraseri*.** Fraser's Fir. The northern species, *Abies balsamea*, is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived. Fraser's Fir, however, a distinct species from the highest peaks of the Carolina mountains, makes a perfect specimen lawn and screen tree, with dark green, thick-set foliage (blue underneath) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

*Abies fraseri* is destined to become one of the most popular and widely planted of Firs, and to meet this demand, we have them by thousands in all sizes.

***Andromeda (Pieris) floribunda*.** 2 to 4 feet. One of the finest of all broad-leaved American shrubs. Compact growth, with shining evergreen leaves and abundant racemes of showy white flowers in May. The next season's buds appear after the flowering season and give the plant the appearance of being in bloom the year round. My stock is all strictly American-grown and of finest quality. The imported *Andromeda* is very often difficult to establish. All plants are heavily budded.

	Each	10	100	1,000
6 to 9 in. ....	80	7 00	60 00

3 to 4 ft. diameter...	2 50	20 00	180 00	

Larger specimens, up to 15 00

Without doubt this is the best prostrate form of Juniper for ground-over. It is at home on sandy or gravelly hillsides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more.

In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the open. It varies in form from the completely prostrate type to the ascending type. 2 to 4 feet high.

We have several thousand transplanted specimens to select from, up to 8 feet in diameter.

	Each	10	100	1,000
<i>communis prostrata</i> . 2 to 3 ft.	75	6 00		
<i>japonica aurea</i> . Golden Japanese Juniper.				
3 to 4 ft. ....	3 00	25 00		
<i>sabina</i> . Savin Juniper.				
1 to 1½ ft. ....	60	5 00	40 00	
1½ to 2 ft. ....	1 25	9 00	80 00	
2 to 3 ft. ....	2 50	22 50	200 00	
<i>tamariscifolia</i> . Grey Carpet Juniper.				
1 ft. ....	1 00	9 00		
2 to 3 ft. ....	2 50	20 00		
<i>virginiana</i> . Red Cedar.				
1 to 2 ft. ....	60	5 00	40 00	
2 to 3 ft. ....	1 00	8 00	75 00	
3 to 4 ft. ....	1 50	12 00	100 00	
4 to 5 ft. ....	2 00	18 00	160 00	
5 to 6 ft. ....	3 50	30 00		
6 to 8 ft. ....	6 00	50 00		
8 to 10 ft. ....	9 00	80 00		
10 to 12 ft. ....	12 00	110 00		
12 to 14 ft. ....	15 00	140 00		

These prices are for transplanted specimens of good grade. Larger sizes or special selection at special prices.

BOXFORD NURSERY makes a specialty of the Red Cedar. It is, we believe, the finest of all evergreens for formal

## Catalog of BOXFORD NURSERY

### EVERGREEN TREES AND SHRUBS (continued)

plantings for New England conditions, giving an effect somewhat like the Italian cypress.

As a background for rhododendrons, shrubbery and flowers, it is unequalled, except perhaps by the Carolina hemlock. It does not take the place of other evergreens, but holds a unique place for certain effects, and no other evergreen can take its place. Individuals vary in color from light and dark green to steel-blue.

We offer hundreds of transplanted specimens up to 20 feet in height. We also collect specimens with large balls in car-lots or less at prices according to selection, ordinarily 75 cents a foot in height.

	Each	10	100	1,000
<i>Juniperus virginiana elegantissima</i> .				
3 to 4 ft. ....	2 00			
<i>virginiana glauca</i> . Blue Virginia Cedar.				
1½ to 2 ft. ....	1 50	12 50		
2 to 3 ft. ....	2 50	22 50		
3 to 4 ft. ....	3 50	30 00		
<i>virginiana globosa</i> . 1 to 1½ ft.	1 50			
1½ to 2 ft. ....	2 00			
<i>virginiana schottii</i> . 1 to 1½ ft.	1 25			
2 to 3 ft. ....	2 00	18 00		
<i>Kalmia angustifolia</i> . Narrow-leaved Laurel.				
6 to 12 in. ....	35	3 00	20 00	

**Kalmia latifolia.** The Mountain Laurel. One of the grandest of our native broad-leaved evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and, when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shining leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardiness of *Kalmia latifolia* is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the middle Atlantic states (particularly in the higher altitudes), till the crest of the southern Alleghanies is reached.

This is another of my specialties and my stock is unequalled elsewhere.

	Each	10	100	1,000
1 to 1½ ft. ....	60	5 00	40 00	
1½ to 2 ft. ....	80	7 00	60 00

2 to 3 ft. clumps ....	3 50	32 50	300 00	
3 to 4 ft. clumps ....	4 50	40 00	375 00	

**Leucothoe catesbaei.** Grows 3 to 8 feet. Few shrub-evergreens of the broad-leaved sort have the grace of this one. The thick, shining green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an under-shrub or for banks and the borders of rhododendron masses or along streams it is without a rival. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun.

	Each	10	100	1,000

1 to 1½ ft.	2 00	18 00
1½ to 2 ft.	3 00	

## RHODODENDRON CAROLINIANUM

### A New American Species

*Clear Pink. Absolutely Hardy.*

The smallest Alleghanian species; though wild, it attains a height of 15 feet and is wide-spreading. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hill-sides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

	Each	10	100

## RHODODENDRON CATAWBIENSE

### Of the Carolina Mountains

*The Hardest of all Rhododendrons*

It was this magnificent Rhododendron that over a hundred years ago was introduced into Europe, supplying, together with *Rhododendron maximum* and *R. punctatum*, color and hardy blood to the cultivated "hybrids", but with a conse-

"And to paint these home pictures we need chiefly American material. We must face this deadly parallel:

"What We Really Plant. 70% European trees and shrubs and horticultural varieties. 20% Chinese and Japanese. 10% American.

"What We Ought To Plant. 70% American trees and shrubs, i. e., native to America. 20% Chinese and Japanese. 10% European and horticultural."

Wilhelm Miller, in "What England Can Teach Us About Gardening."

### EVERGREEN TREES AND SHRUBS (continued)

quent loss of hardiness; and so today, for American gardens, where ironclad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghanies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known *Rhododendron maximum*, we can recommend the true native catawbiense as the finest for general use, withstanding exposure and extremes of temperature where other *Rhododendrons* fail.

Do not confuse this true species, which is absolutely hardy, with the common so-called catawbiense hybrid seedling so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike *Rhododendron maximum*, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy, half-breed, imported variety noted above), and as sent out by Highlands Nursery is always on its own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner *Rhododendron maximum*, the value of *Rhododendron catawbiense* cannot be overestimated.

Do not compare our many-stemmed clumps with the single-stemmed, "bushy", half-hardy *Rhododendrons* offered by importers. There is no comparison.

Catawbiense hybrids. Hardest varieties, including the following:

Album elegans, Anna Parsons, caractacus, catawbiense alba, everestianum, General Grant, Mrs. Milner, President Lincoln, Parsons' Gloriosa, purpureum elegans, roseum elegans and others, according to size and selection, \$1 to \$1 each.

## RHODODENDRON MAXIMUM

### The Great American Rosebay

*Perfectly Hardy in the Latitude of Quebec*

*Rhododendron maximum* is, without doubt, the noblest of American broad-leaved shrubs. It is found growing sparingly in New England and New York, more abundantly in the Pennsylvania mountains, but reaching perfection only in the southern Alleghany Mountains, where it grows in such luxuriance as to form a striking feature in the mountain landscape. Its large, waxy white or delicately pink flowers appear in large trusses in July, the latest of all the *Rhododendrons*, greatly enhancing its ornamental value as a broad-leaved evergreen for finished landscape effect.

Not even in Asia do *Rhododendrons* grow more luxuriantly than in our southern Alleghany Mountains, where they attain a height of 30 feet or more. They must be seen in their native lavishness of growth and bloom, on the mountainsides or hanging over the dashing, ice-cold streams and waterfalls, to be properly appreciated, and a trip to the high Carolina mountains in spring and early summer is a never-to-be-forgotten series of joys to the lover of nature.

### HARDY AZALEAS

The finest Azaleas in the world for permanent planting under American conditions are native species, including *A. arborescens*, *A. vaseyi*, *A. lutea* (calendulacea), the great flame-colored Azalea, and *A. nudiflora*, *A. viscosa* and *A. canescens*.

I have a stock of thousands of the finest plants in all sizes that will give immediate effect, and prices will be sent on request. It should be remembered that Azaleas play a very important part in the making of a permanent Rhododendron-bed, but care must be used to avoid clashing of colors. I shall be glad to make up proper combinations for my customers.

DECIDUOUS TREES AND SHRUBS (continued)

### LILACS ON THEIR OWN ROOTS

Fine collection of some of the best and newest hybrids in specimen stock. It is only recently that Lilacs on their own Roots were obtainable.

Ordinary stock is grafted on Privet, which "suckers" badly, often crowding out and killing the grafted top and leaving a Privet instead of a Lilac. The Lilac is the queen of spring-flowering shrubs, and the new hybrids mark an epoch in horticulture. For a tall hedge or screen there is nothing better than the Lilac, and for this purpose the old-fashioned white and purple sorts make a charming combination.

D—double varieties; S—single varieties.

	Each	10	100	1,000
<b>Syringa Alphonse Lavelle. S. Light Lilac.</b>				
3 to 4 ft. ....	75	6 00

## Catalog of BOXFORD NURSERY

### Hardy Native Ferns

Sizes following Ferns indicate the size the plant may be expected to attain under cultivation.

	Each	10	100	1,000
<i>Adiantum pendatum</i> . Maiden-hair Fern. 8 to 20 in....	\$1 00	\$8 50	\$75 00	
<i>Aspidium (Dryopteris) acrostichoides</i> . Dagger Fern. 8 to 20 in. ....	75	6 00	50 00	
<i>brauni</i> . 16 to 36 in. ....	1 50	12 50		
<i>cristatum</i> . 1 to 2 ft. ....	75	6 00		
<i>cristatum clintonianum</i> . 16 to 52 in. ....	1 00	8 50		
<i>filix-mas</i> . 12 to 44 in. ....	1 50	12 50		
<i>goldianum</i> . Goldie's Fern. 24 to 40 in. ....	1 50	12 50		
<i>marginalis</i> . Shield Fern. 12 to 28 in. ....	75	6 00	50 00	
<i>munitum</i> . Chamisso's Shield Fern. ....	2 00	17 50		
<i>noveboracensis</i> . New York Fern. ....	75	6 00		
<i>spinulosa</i> . Spinulose Shield Fern. ....	1 00	8 00		
<i>spinulosa dilatatum</i> . Broad fronds. ....	1 50	12 50		
<i>thelypteris</i> . Marsh Shield Fern. ....	1 00	8 00		
<i>Asplenium angustifolium</i> . 3 to 4 in. ....	1 25	10 00		
<i>ebeneum</i> . 9 to 18 in. ....	1 00	8 00		
<i>filix-foemina</i> . Lady Fern. 16 to 40 in. ....	1 00	8 00		
<i>thelypteroides</i> . Silvery Spleenwort. 2 to 3 ft. ....	1 00	8 00		
<i>trichomanes</i> . Maiden hair Spleenwort. 3 to 8 in. ....	1 00	8 00		
<i>Botrychium ternatum dissectum</i> . 4 to 16 in. ....	1 00	8 00		
<i>obliquum</i> . 4 to 16 in. ....	1 00	8 00		
<i>virginianum</i> . Virginia Grape Fern. 1 to 2 ft. ....	1 00	8 00		
<i>Camptosorus rhizophyllus</i> . Walking Fern 4 to 12 in. ....	1 25	10 00		
<i>Cheilanthes fendleri</i> . Lip Fern. ....	4 00			
<i>Cystopteris bulbifera</i> . Bladder Fern. 1 to 2 ft. ....	75	6 00		
<i>fragilis</i> . Brittle Fern. 4 to 12 in. ....	1 00	8 00		
<i>Dicksonia punctilobula</i> . Hay-scented Fern. 20 to 40 in. ....	1 00	8 00	60 00	
<i>Lygodium palmatum</i> . Climbing Fern. 1 to 3 ft. ....	1 50	12 50		
<i>Onoclea sensibilis</i> . Sensitive Fern. 4 to 12 in. ....	1 00	8 00	60 00	
<i>struthiopteris</i> . 2 to 10 ft. ....	1 00	8 00		
<i>Ophioglossum vulgatum</i> . 2 to 42 in. ....	1 00	8 00		
<i>Osmunda cinnamomea</i> . Cinnamon Fern. 32 to 63 in. ....	1 50	12 00	100 00	
<i>claytoniana</i> . Clayton's Fern. 2 to 4 ft. ....	1 50	12 00	100 00	
<i>gracilis</i> . 2 to 6 in. ....	1 00	8 00		
<i>regalis</i> . Royal Fern. 12 to 63 in. ....	1 50	12 00		
<i>Pellaea atropurpurea</i> . Purple-stemmed Cliff Brake 4 to 24 in. ....	1 50	12 00		
<i>densa</i> . ....	1 00	8 00		
<i>gracilis</i> . Slender Cliff Brake 2 to 6 in. ....	1 50	12 00		
<i>Phegopteris dryopteris</i> . Oak Fern. 6 to 10 in. ....	1 00	8 00		
<i>hexagonoptera</i> . Broad Beech Fern. 7 to 12 in. ....	1 00	8 00		
<i>polypodioides</i> . 4 to 8 in. ....	1 00	8 00		
<i>Polypodium falcatum</i> . 6 to 15 in. ....	1 25	10 00		
<i>vulgare</i> . Polypody. 3 to 6 in. ....	75	6 00	45 00	
<i>Pteris aquilina</i> . Common Brake 4 to 36 in. ....	75	5 00	30 00	
<i>Scolopendrium vulgare</i> . ....	3 00	20 00		
<i>Woodsia ilvensis</i> . Rusty Woodsia. ....	1 00	8 00		
<i>obtusata</i> . Blunt-lobed Woodsia. 8 to 20 in. ....	1 00	8 00		
<i>Woodwardia angustifolia</i> . ....	1 50	12 50		
<i>virginica</i> . Virginia Chain Fern. 24 to 64 in. ....	1 00	8 00		

# KELSEY'S HARDY SPECIMEN EVERGREENS

Catalog of HIGHLANDS NURSERY

## CATALOG OF HIGHLANDS NURSERY

### PART II

At my Highlands Nursery, Pineola, North Carolina, 3,800 ft. elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoes, Kalmias and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of rare American plants of unquestionable hardiness—the best for American gardens.

The Carolina Mountains is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery.

### DECIDUOUS AND EVERGREEN

## Trees, Shrubs, and Woody Vines

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise.

This is a catalog of nursery-grown plants growing at my Highlands Nursery, Pineola, North Carolina.

	Each	10	100	1,000

EVERGREENS ARE MARKED WITH A STAR (\*)

# Juniperus communis, var. depressa

FOR EXPOSED HILLSIDES AND BANKS

THRIVES IN SANDY SOIL

This is, without doubt, the finest evergreen ground-cover of this type we have. One of the greatest needs in landscape work has been for reliable evergreens, *entirely prostrate*, giving a mat or carpet of green the year round.

It transplants readily, and from small plants spreads rapidly—a single plant often reaching a *diameter of 15 feet or more*.

This Juniper varies from the entirely prostrate type of but a few inches high to 2 or 3 feet high, and in color from deep green to a blue-green. The berries, or fruits, are blue-green and very ornamental.

A splendid stock of transplanted plants is offered, all with ball.

## PRICES ARE F. O. B. CARS, BOXFORD NURSERY

To Landscape Architects, Parks, Cemeteries,  
Botanical Gardens, and other Public Institutions  
a special discount of **10%** will be allowed on  
prices in this catalogue.

## LEUCOTHOE CATESBAEI

Few shrub evergreens of the broad-leaved sort have the grace of this one. The thick, shining, green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an undershrub, or for banks and the borders of streams, it is without a rival. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun.

There is no broad-leaved evergreen that compares with the hardy *Leucothoe catesbaei* for massing with *Rhododendrons* and *Kalmias*. It supplies a finished edging, with fine foliage contrasts the year round.

# A Splendid American Conifer

*Abies fraseri, True Fraser's Fir*

To Landscape Architects, Parks, Cemeteries, Botanical Gardens, and other Public Institutions a special discount of **10%** will be allowed on prices in this catalogue.

Specimen Fraser's Fir on Grounds of Highlands Nursery  
Absolutely hardy. Makes a fine windbreak

# *Abies fraseri*

## THE TRUE FRASER'S FIR

---

THE northern species, *Abies balsamea*, is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived.

Fraser's Fir, however, is a distinct species from the highest peaks of the Carolina mountains, and makes a perfect specimen lawn and screen tree, with dark green, thick-set foliage (*blue underneath*) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

### ABIES FRASERI (Fraser's Fir)

	Each	Per 10	Per 100
1-1½ feet . . .	\$0.30	\$2.00	\$12.50
1½-2 feet . . .	.60	5.00	40.00
2-3 feet . . .	1.25	10.00	80.00

Extra specimens, with ball, and of perfect shape, 6 to 8 feet, at \$6 to \$8 each; larger sizes, \$10 to \$15 each.

# A New American Rhododendron

## *R. carolinianum*

Specimen plant supplied by Highlands Nursery. Flowers  
clear pink without the slightest tinge of magenta

# Rhododendron carolinianum

*A New American Species*

*Clear Pink*

*Absolutely Hardy*

---

THE smallest Alleghanian species; attains 6 to 8 ft. in cultivation. Leaves dark green, usually blunt and narrow, covered with rusty dots below; much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species. Until this year we have been sending this beautiful and rare species out under the name of *punctatum*. Professor Sargent has recently called attention to the fact that it is a distinct species from the *punctatum*, differing in time of bloom, with more showy and profuse flowers, and making a much larger and finer plant than the true *punctatum*.

It is now known as *Rhododendron carolinianum*, being described and named by Alfred Rehder, Arnold Arboretum, Jamaica Plain, Mass.

## Sizes and Prices, f.o.b. Boxford Nursery

## RHODODENDRONS and MOUNTAIN LAUREL

### "COLLECTED" CLUMPS BY THE CARLOAD

Delivered at your station. To be shipped from point  
determined by me.

For the area covered and effect produced, a carload of Rhododendrons or Kalmias, offered below, is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept cheap stock, thrown into cars without burlaping, and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end. While fine results may be had from "collected" Rhododendrons, particularly if purchased from a reliable source, where greatest care is used in digging and handling, results are never so sure as when nursery-grown stock is used.

#### Rhododendron catawbiense "Collected" Clumps

Each plant collected from the open. Prices, delivered f. o. b. your station, if east of the Mississippi river.

Car containing 200 clumps, 1 to 3½ ft., for .....\$280 00

Car containing 300 clumps, 1 to 3½ ft., for ..... 380 00

Car containing 400 clumps, 1 to 3½ ft., for ..... 480 00

Car containing 600 clumps, 1 to 3½ ft., for ..... 600 00

Other combinations and sizes quoted on request.

#### Rhododendron maximum "Collected" Clumps

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River, collected from open ground.

Car containing 300 clumps, 1½ to 4 ft., for .....\$300 00

Car containing 400 clumps, 1½ to 4 ft., for ..... 375 00

Car containing 600 clumps, 1½ to 4 ft., for ..... 500 00

Other sizes or combinations will be made up to suit customers. It is far cheaper to buy my kind at slightly increased price, and have plants that will grow.

#### Rhododendron maximum and R. catawbiense

"Collected" Clumps by the Carload

Mixed cars, delivered free at any station east of the Mississippi River. Car containing 150 maximum and 150 catawbiense, collected as above. 1½ to 4 ft., clumps,—total of 300—for \$400. Car containing 250 maximum and 250 catawbiense 1½ to 4 ft., clumps,—total of 500—for \$550.

#### Kalmia latifolia (Mountain Laurel)

"Collected" Clumps by the Carload

Highest-class clumps collected from the open, delivered free at your station, if east of the Mississippi River.

HAVE YOUR CLUMPS BURLAPED. IT IS THE ONLY  
PROPER WAY TO HANDLE SPECIMEN PLANTS.

SEE NEXT PAGE FOR COST.

EVERGREENS ARE MARKED WITH A STAR (\*)

# KELSEY'S

Hardy American Plants  
Rhododendrons and Azaleas

## Catalog of HIGHLANDS NURSERY

Car containing 400 clumps, 1 to 3½ ft. for \$375. Kalmia may be added to help fill any Rhododendron car at 90 cts. per clump, not less than 100 clumps in shipment.

The above "Carload" offers are made with a view of furnishing a variety of sizes that will permit of naturalistic grouping.

"Collected" Rhododendrons and Kalmia by the 100 and 1,000. The number that may be shipped in a car varies largely, depending on sizes. The minimum weight allowed per car is 16,000 lbs., with a freight rate from my Highlands Nursery to Baltimore of \$84, New York \$88, and Boston \$96.

A car may easily be loaded much heavier, with proportionate increased freight charge, but not increasing the cost per plant.

A full car travels safer than one with a small load.

All "Clumps" offered below are collected with a good ball and are burlaped separately.

### PRICES OF "COLLECTED" CLUMPS OF RHODODENDRONS AND KALMIAS

Rhododendron catawbiense.	Each	10	100	1,000
1 to 2 ft. "collected" cl.	\$1 50	\$10 00	\$80 00	\$700 00

3 to 4 ft. "collected" cl.		17 50	150 00	1300 00

### TERMS

**TERMS** cash, or satisfactory references from unknown parties. Accounts due the first of each month, unless by special arrangement. 5 at 10 rates; 50 at 100 rates; 500 at 1,000 rates.

**PRICES QUOTED** are for grades as specified. For extra selection an extra charge is made to fit the value of the plants.

**SEND FOREIGN REMITTANCES** by Postal Money Order, drawn on Salem, Mass., post office; or by New York or Boston Exchange. An American dollar equals four shillings, four marks or five francs.

**PACKING CHARGES FREE** at prices in this catalog for shipment by freight or express. Team and auto delivery to North Shore or Boston points at net cost.

### BURLAPING

It always pays to burlap the larger sizes of trees and shrubs, especially evergreens, even if planted the same day. No charge is made for burlaping single plants as quoted. Otherwise burlaping is charged as follows:

2 to 3 ft. clumps and trees	5 cents each
3 to 4 ft. clumps and trees	7 cents each
4 to 6 ft. clumps and trees	8 cents each
6 to 8 ft. clumps and trees	10 cents each

and larger sizes in proportion. In car lots of Rhododendrons and Kalmias a uniform charge of 5 cents each will be made. Unless instructed to the contrary, I assume customers desire proper burlaping, which will be added to the invoice.

### GUARANTEE

No guarantee, expressed or implied, is made that stock will grow whether planted by me or not.

Having no control over after treatment of plantings, or over weather conditions, it is obvious that purchaser must assume all responsibility after delivery in good condition.

All shipments travel at consignee's risk, and transportation companies must be held liable for damage in transit.

Claims for errors must be made on receipt of goods. If there is any mistake or fault on my part it will gladly be rectified.

**LANDSCAPE FORESTRY.** Evergreen seedlings and transplants in large quantities are grown at both nurseries in the choicest species. We do Landscape Forestry, treating woodlands from a Landscape standpoint as well as for commercial uses. Mr. Kelsey is open for consultations and engagements. Always address,
